The following is an examiner's statement of reasons for allowance: While plate fin heat exchangers for three or more fluids are known in references such as Johansson and Wand, no plate fin heat exchanger can be found with the flows going parallel to each other and the areas for the first and second fluids extend only across a portion of the width. While a cross section of the Johansson and Wand heat exchangers may have interspersed lines of different fluids, all fluids have passages across the entire width of the heat exchanger.
